# **HISTORY**

## **Task1:**

### **INDUS VALLEY CIVILIZATION**

#### **Six causes of Decline of the Harappan Culture**

The decline of Harappan culture has evoked the historians to find out its causes.

##### **1. Law of Nature:**

Renowned historian Arnold Joseph Toynbee has categorized the decay of a culture as its final stage after a culture is born and grows to its highest point of efficacy. The Harappan culture was no exception to this general law of nature. Its decline set in around 1800 B.C. and in course of time came its extinction.

##### **2. Floods:**

The massive floods in the Indus must have been a potent cause for the extinction of the Harappan culture. The point is proved by the silt-clay that covers the collapsed houses at Mohenjo-Daro. Repeated floods must have forced the people to flee the inundated places and set up permanent habitat elsewhere. As a consequence came the decline of Harappa.

##### **3. Earthquakes:**

Geographically, the Harappan culture occupied an area that was prone to earthquakes as it came under a seismographic zone. Repeated seismographic vibrations must have led to erosion that brought down the buildings. Earthquakes constitute an important reason for the decline of Harappan culture.

#### **4. Change of the Course of the Indus:**

Some Historians attribute the decline of the Harappan culture to the river Indus changing its course frequently. As such the Indus delta shifted away from Mohenjo-Daro and water became scarce. Water scarcity must have led to the evacuation of the Harappan people to other places. Yet, the change of course of the Indus is not reason enough for the decline in Lothal, Kalibangan, Rupar etc. because the Mohenjo-Daro situation did not occur in these regions.

#### **5. Plague:**

Outbreak of the plague epidemic is shown as a reason for the decline of Harappan civilization. Skeletal remains from the main roads of Harappa and Mohenjo-Daro as found out through archaeological efforts tell a sad story. When an epidemic like plague visits a human habitation, it leaves its trail of death everywhere. The scattered skeletal remains therefore lead some to attribute it to epidemic like plague, though there is no concrete proof of outbreak of plague in the region.

#### **6. Foreign Invasion:**

There is archaeological proof of killing and unburied skeletal remains scattered everywhere in Mohenjo-Daro. An autopsy on these skeletons reveals damages that must have been caused by sharp objects or weapons. Knowledge and use of iron as weapons was known to the Aryans, not to the Harappan people. Defeat and death of the Harappan people must have come at the hands of the invading Aryans.

The Aryan cavalry must have been an adverse point for the Harappans who did not know the use of horses.

The multiple causes, enumerated above, were responsible for the decline of Harappan culture. Thanks to archaeological efforts, we now know a lot about this oldest urban culture of India. Indeed their town-planning, social and religious life, the Lothal port, the unique art and architecture, artifacts and pottery have led everybody to look upon them with awe and admiration. India and the world marvels at the wonder of Harappan culture. Yet, this culture could not defeat the law of nature and was, as such, not imperishable.

#### **Answer the following question:**

1. After reading the above extract, what is your opinion on how and why the Indus Valley Civilization came to an end? (Min 150 words)

## Task 2:

### **ANCIENT CHINA**

- **Geography of Ancient China:** The geography of Ancient China shaped the way the civilization and culture developed.

1. Use the atlas to identify the locations of all the countries in Africa, North America, South America and Asia.

### Longitude and Latitude Revision:

Please attempt the following questions on an A4 paper:

#### Scavenger Hunt

Using your knowledge about latitude and longitude answer the following questions. Remember latitude is always listed first and longitude is always listed second.

1. What direction do lines of latitude go, vertically or horizontally? \_\_\_\_\_
2. What direction do lines of longitude go, vertically or horizontally? \_\_\_\_\_
3. Name of the line that is 0 degrees longitude. \_\_\_\_\_
4. Name of the line that is 0 degrees latitude. \_\_\_\_\_
5. What continents lie mostly west of the Prime Meridian? \_\_\_\_\_
6. What continents lie mostly west of the Prime Meridian? \_\_\_\_\_
7. What continents lie mostly east of the Prime Meridian? \_\_\_\_\_
8. What continents lie mostly north of the Equator? \_\_\_\_\_
9. What continents lie mostly south of the Equator? \_\_\_\_\_
10. The name of a city that is located at 39 degrees north and 75 degrees west. \_\_\_\_\_
11. What city is located at 51 degrees north and 0 degrees west? \_\_\_\_\_
12. Find the latitude and longitude coordinates for Cairo, Egypt. \_\_\_\_\_
13. The coordinates 40 degrees north and 100 degrees east fall in what country? \_\_\_\_\_
14. The coordinates 20 degrees south and 140 degrees east falls in what country? \_\_\_\_\_
15. What city is located at 12 degrees south, 77 degrees west? \_\_\_\_\_
16. This capital city is located at 48 degrees north and 16 degrees east. \_\_\_\_\_
17. Name of the building that is located at 39 degrees north and 77 degrees west? \_\_\_\_\_

If you are having trouble finding the answer to number 17 here's a hint! (HINT: Using the first letter of the answer to number 10 (\_\_\_\_\_), the first letter of the answer to number 16 (\_\_\_\_\_), the second letter of the answer to number 13 (\_\_\_\_\_) and the third letter of the answer to number 14 (\_\_\_\_\_) you will spell out the answer to number 8!)

## Where is the buried treasure?

There's nothing more exciting than the idea of finding a buried treasure. A letter was recently found that had latitude and longitude coordinates on it which are believed to identify the country the treasure is buried in. Using an atlas, find the country located at each set of coordinates and write the name of the country and underline the first letter. Once you find all the coordinates, the first letter of each country name together should spell out the name of the country where the treasure is located. Put an 'X' for ('X' marks the spot) on the country.

Latitude	Longitude	Country Name
42 degrees north	14 degrees east	
24 degrees north	45 degrees east	
60 degrees north	90 degrees east	
34 degrees north	66 degrees east	
9 degrees north	39 degrees east	
20 degrees north	103 degrees east
